---

CNS LOGISTICS LLC | company profile
The concept of complete service has proven to be a key to CNS success. CNS all round service package will enable our clients to charter Ships in confidence with assurance that the transport will be capably handled, independently by CNS.

Warehousing and Distribution

CNS Logistics handles General and cold storage Warehousing facility and manages storage and distribution services for leading companies in the UAE and worldwide. Further, we have customers who are international branded companies looking for importing bulk cargo to the UAE and re-exporting within the UAE and Middle East /Africa as per market requirements.

CNS Logistics consolidate and manage the Movement of Merchandise to distribution centers and retail outlets domestically, regionally and around the globe. CNS Logistic provides consolidation services that improves reliability and reduces Supply chain costs for our customers. When our customers do not need an entire ocean container, LCL (Less than Container Load), CNS Logistics will combine or consolidate the products in one FCL (Full Container Load) with multiple customers cargoes, so that our customer will save more money by paying only the freight rates based on the actual shipment dimensions and weight. We will utilize the container space and organize the container loading according to the different characteristics of the goods and design the direct and transshipment routes and solutions to meet the different requirements of the customers.

Store ready orders are consolidated at the CFS. Products are picked and packed in accordance with store requirements, palletized and stretch wrapped before loading of containers. These containers, upon arrival at destination, go straight to the stores.

Apart from the simple cargo consolidation programs, all the other programs can be so designed to allow un-loading at destination distribution centers with arrangements for cross dock delivery or direct distribution to retail stores. These kinds of arrangements give significant costs reduction of distribution at destinations for customers.

De Consolidation and transloading and Re-Distribution Solutions:

Distribution decisions closer to demand reduce facility costs when you use CNS Logistics De Consolidation services. Expedite delay in transit or transload improve shipments to reduce inland transport costs or distribute to Multiple final destinations. Our facility provides low cost, highly flexible de consolidation, domestic and regional consolidation services.

Some specific service we have tailored for our partners include:
- Consolidation & vendor Management.
- Multi country Consolidation.
- Data Management/EDI clearing house.
- Purchase order (PO) Management.
- Vendor Management & Compliance.
- Receive/Sort/Segregate
- Cross-Docking.
- Quality Assurance and Inspection programs.
- Production compliance.
- Pick and pack.

Warehousing & Deconsolidation:

- Warehouse Management.
- De Consolidation.
- Vendor-Managed Inventory.
- Dedicated contract carriage.
- Automated pick & pack operations.
- Returns Processing (Reverse Logistics)
Contract Ware Housing:

We have a complete range of Warehousing and distribution services. Our Facilities blend modern systems and equipment with industry-best practices to lower your warehousing and distribution costs while increasing your service levels. Our unmatched experience in managing dedicated and multi-user facilities supports customers.

CNS Logistics network of multi-client distribution centers gives you unparalleled flexibility to manage your dynamic distribution requirements. Typical agreements allow you to pay only for the space and services you need, when you need them. Our multi-Client warehouse solution enables you to control warehouse costs by sharing overhead with other clients.

CNS Logistics is the single-source contact for many customers with multiple distribution center needs across the country, continent or globe.

We can design solutions tailored to your unique needs with facilities, equipment and people dedicated to your business. This allows you to focus investments on supporting your core business. Our dedicated warehouse management solutions help you reduce operational costs through efficient processes and targeted use of warehouse automation and reduce inventory through better supply chain planning.

With Vendor Managed Inventory (VMI), we fully manage your end-to-end inventory planning and replenishment at a service level and price you decide upon.

CNS Logistics works with suppliers to set up VMI programs in distribution centers, in order to allow customers to buy on consignment and increase availability of products. Working closely with you and your suppliers, we automate the forecast management process, using web-based software that enables the flow of supply to more accurately mirror store-and even shelf — demand. When store or DC inventory falls below pre-determined levels, auto alerts are sent to you and your supplier to prompt replenishment. Advanced Shipping Notices (ASNs) provide detail on in-transit inventory from suppliers so you have visibility to inventory deeper into the supply chain.

This allows for confident commitment to orders based on this inbound flow. Postpone inventory Ownership until shipment to your site. Once your inventory is moved to the CNS Logistics DC, We work with your suppliers to transition inventory ownership until demand occurs. We can store and stage product for replenishment at our DCs, Often freeing up your own DC space or limited store rooms.

We take full responsibility for your inventory, freeing you to spend the time running your business. We also enable you to reduce supply chain inventory, eliminate out of stock goods and decrease logistics costs. Using shared data, the suppliers are able to better plan production schedules, procure raw materials more efficiently and achieve greater stability through consistent demand planning. We help suppliers with production forecasting, transportation management and distribution to better fill customer orders, while reducing total supply chain inventory with forecast visibility, comparing actual demand against DC-on-hand, store-on-hand and in-transit inventory.

Direct to store Floor-Ready Distribution

Our store Ready Shipment Solution provides fast, efficient logistics service for retailers and manufactures that require great speed for ongoing seasonal products destined for retail stores. More consumer companies are turning to CNS Logistics for total supply chain visibility and inventory solutions. CNS Logistics has the flexibility to allow rapid substitutions, in-transit reallocations, and store Ready Shipment delivery to an industry whose profitability depends on these exact abilities. These supply chain solutions reduce the cost transportation, warehousing, and distribution while maximizing responsiveness to major retailers. You achieve maximum sales opportunities, often ahead of the competition while building customer loyalty through consistent product availability over the long term. When you ship with CNS logistics, you cut days from traditional distribution, maximize inventory turns, reduce carry costs per shipment and ease the risk of stock-outs. For sales product launches, we distribute time-sensitive displays and end caps and advertising materials to stores.
CNS Logistics moves your supply chain decision-making points closer to final distribution, while at the same time meeting your customer’s demands. We help you achieve economies of scale in warehousing, distribution and transportation to drive down your overall logistics costs. With a strong tradition of success in the UAE, CNS Logistics offers a wide range of supply chain services — from pick-pack service to a variety of levels: master, inner, or unit, warehousing and distribution services to transportation and freight management. In addition, these services are all backed by superior information technology, allowing you track your inventory down to the SKU level as it moves through the Supply chain. As retailers increase the demand for vendors to deliver store-ready, consumer-ready merchandise, CNS Logistics can handle all details at the pre-ship point from anywhere in the world to your destination. Services offered include product selection, palletizing, Shrink wrapping, loading and international freight Management.

Reverse and Aftermarket Logistics
Reverse logistics is our post-sales support process in which we move goods from their typical final destination for proper or to capture value. CNS Logistics’ aftermarket logistics capabilities include it’s leading solutions, which can handle the most complicated service-parts requirements. Reverse logistics includes inventory processing (excess, seasonal and returned due to damage), shelf-life management, restocking, inventory control and traffic, salvaging, Re-working, re-packing, re-labeling, testing and recall. We also include recycling programs, hazardous material programs, asset recovery activities and obsolete equipment disposition.

Assembly and Packaging
You face the continuous challenge of meeting your customer’s product requirements. Changes in package variations make it difficult to deliver the right product to the right customer. That’s why you need a partner like CNS Logistics. Whether you need to assemble multiple components or create a value pack for a retailer, CNS Logistics has the solution that will add speed and efficiency to the process.

Using CNS Logistics technologies and facilities for packing and labeling operations with our service teams will reduce delays and quality problems. We help configure products in any form, whether it is bundling, shrink-wrapping, barcode label creation or other custom packaging or labeling. We also provide special protective packaging for large component shipments containing glass or fragile accessories.

Co-locating the assembly and/or packaging with the storage of your products not only saves money but removes steps in the supply chain. The elimination of transportation time to a packaging facility means you can reduce your lead times and decrease your inventory. And by having CNS Logistics perform all these activities you get the same visibility and operational excellence that you’ve grown to expect from the market leader in contract logistics.

Cold Storage Warehousing
CNS Logistics currently holds leased DP world cold store warehousing facility in JAFZA where major part of the frozen and perishable foods is stored at -21 degrees to +5 degrees. CNS Logistics team provides its multinational customers the complete cold storage warehousing solutions. The advantage of facility is that it is loaded at the quay side of the port and reduces cargo shifting charges as well as municipality check is done at the facility itself thus avoiding long queues and waiting charges by the trucking companies.

International Air / Sea / Land Freight Forwarding Management
CNS Logistics provides comprehensive and professional service for delivery of your cargo by air, sea or by land. As one of the leading air, sea and land freight forwarders, we can handle large volumes on a global basis or specific requirements on a single route at any time and to any destination. We can manage your shipments on an individual basis or as part of an integrated supply chain solution. Our Logistic services also include Warehousing, Inventory Control, Domestic & Worldwide Distribution, Container Drayage, Trucking, Logistics Consulting, Insurance Coverage & Claim Service, Customs Brokerage, and Worldwide.
CNS Logistics is recognized as a leading intermediary providing extensive global coverage for your transport and forwarding services. You have a single point of contact investigating the carriers, trade lanes and service levels that best meet your needs. We track availability, frequency, transit time and cost, allowing you to easily select the service level you need. Our team of highly specialized industry professionals works to achieve the best possible solutions for your needs. With our process oriented approach and strong customer focus, you can be assumed that we work extra hard in meeting your special needs.

Our range of freight management services encompasses:

- Air Freight
- Sea Freight
- Consolidation Services
- Local Origin Transportation
- Destination Transportation
- Total Shipment Visibility (Online Track and Trace)

Air Freight

Shipping your cargo by air with CNS Logistics will keep goods moving at optimal speed and efficiency along the supply chain. As one of the leading airfreight forwarders in the world, our Air Freight Services provides three solutions, Value, Speed and Low Cost. We have established a professional air cargo services team spreading around main airports in Africa, Middle East, Asia, Europe, Australia and North America. We are capable of handling import & export shipment from/to the four corners of the world. In order to satisfy your demand of space allocation and competitive price, we have kept strong relationship with airlines, agent and partners major carriers that secure space on hundreds of flights and we offer charter flights for your larger consignments. Our worldwide portfolio of preferred carriers, chosen for their professionalism, reliability and capacity, is complemented by the best local carriers, help us maintain peak and off-speak transit consistency.

CNS Logistics also has range of value-added freight management services such as managing carrier contracts on your behalf.

Additional Sea Freight Services:

- Quality CFS facilities at major ports.
- Customs- in house automated clearance.
- Transportation expertise at origin and destination.
- Load factor optimization.
- Customized consolidation.
- Local, proactive vendor management.
- Vendor documentation.
- Customized management reports.
- Audit and compliance management.
Our Professional Services

- CFS inventory visibility.
- Build to order consolidations.
- Direct to store or Distribution Centers Exclusive.
- Packing, labeling palletization and bar-coding.
- PO/SKU line item visibility.

FCL (Full Container Loads)

Terms of attractive rates, transit time, security and service worldwide from our close partnership with premier sea carriers. Our value service is designed for customers seeking the most effective “Full container load” (FCL) sea freight option, while still meeting important time schedules. CNS Logistics will deliver your FCL shipment anywhere worldwide.

LCL (Less than Container Loads)

Our experience in handling and packing LCL at our CFS is proven and used by many of the leading global companies. CNS Logistics offers superior services providing regular, reliable, fast and cost effective weekly sailings from Asia. We offer reliable port-to-port and door-to-door transit times consistently throughout the year. Our Less than Container Load (LCL) Service offers you shipments with fixed schedules under our control at origin/destination. It is most consistently reliable LCL shipping service available.

Our experience in handling and packing LCL at our CFS is proven and used by many of the leading global companies.

Information Technology Solutions & Services

CNS Logistics facilities use the (WMS) Warehouse Management System and (TMS) Transport Management System Information Dynamics. This advanced application manages all warehousing processes, including receiving, put-away, replenishment, picking, packing, labelling and shipping.

With these powerful tools that let you monitor and manage shipments, from the factory, while in transit, and to your distribution centre or retail store. Easy, fast access to data improves planning and increases control across the supply chain.

Our Associates use mobile, radio-frequency (RF) communications equipment to receive, put-away, replenishment, pick, load, ship and inventory. Using RF communications, in combination with bar coding, increases productivity and data accuracy while improving inventory visibility.

Our web-based portal enables each of our Clients to view and manage inventories, 24x7, through a secure Internet connection. Clients can view inventory levels and event history as well as submit changes and adjustment to product orders and movement requests prior to shipping. The portal also allows customers to request and view reports online.

Our Shipment tracking offers detailed results and simplified report functions. In addition to tracking by shipment reference number you can track shipments using a container number. You’ll receive detailed shipment status, including information on Shipper, Consignee, and container volumes.
Information Dynamics Promotes Accountability with a historical log of everything that happens in the system. The log contains items such as: Date & Time Stamp – Who Performed the Task, Where Product was moved “From” and “To”, Product Details - Inventory Owner. This information is kept on the system as long as you feel necessary. For example, some clients are contractually required to keep 7 years of data in the system.

AD-Hoc Reporting

Always Current Information

Eliminate Physical Inventories due to improved accuracy with (Cycle Counting, Reduced data entry, etc.)

Improved Labor Productivity

Advanced Functionality for Kitting, Returns, Fulfilment, and Pick and Pack

Web Enablement - Gives customers inventory visibility of their products and the ability to add & update their orders.

Robust 3PL Functionality that is unparalleled

Flexible & Configurable

The system uses barcodes throughout the operation. All barcode labels are completely customizable and can be specific to each customer, order, consignee etc.

Information Dynamics comes with Crystal Reports embedded within to generate all reports in the operation. CNS Logistics provides over 100 various reports which can be customized at your request.
A well-designed and well-managed customs clearance program reduces cycle times, improves shipment visibility and lowers cost. Local experts of our Customs service enable timely and reliable movement of your goods through the customs process. We offer clearance in a consistent, timely and cost-effective manner by acting as a direct extension of your business to develop individual service programs that are uniquely tailored to your needs. You are assigned a single point of contact that is trained to handle all of your customs clearance needs by licensed professionals to the extent permitted by law and information system interfaces that are connected to customs authorities. Where available we provide translation and classification for documents. Because we check cargo availability, arrange physical inspections, re-stuffing and delivery, you have time to spend with your business. We also arrange survey of damaged cargo and obtain damage/loss reports to protect your right to make claims through underwriters.

If your goods sit on a dock awaiting customs clearance for a day, your product flow advantage is squandered. Additionally, incomplete or wrong customs documentation can cause considerable delays in transportation, reducing supply chain and delivery reliability.

Our global logistics network of local experts understands the nuances of their respective country’s customs regulations, giving you the critical edge in expediting customs clearance and delivery of shipments.

We electronically integrate customs brokerage event information and activities into our global transportation and distribution network. This information is directly linked to transportation and inventory management data, leading to a seamless, cost-effective global transportation and customs clearance process that assures maximum data quality and an efficient, secure service that delivers your shipments on time.

CNS Logistics is having a valid Private CFS License from Dubai Ports Authority to operate consolidation and LCL services for various trading and manufacturing units through our 110,000 Sq.Ft warehouse located in Jebel Ali Free Trade Zone. A positive feature is the location of free zone in close proximity with the Middle East ports, having regular services by liners calling at Jebel Ali port. This enables CNS Logistics to perform multi country consolidation with ease.

CNS Logistics team of professionals handles consolidation of cargo at multiple regions round the globe. With this consolidation service CNS Logistics has built a strong relationship with several internationally branded companies. Dubai being located in the best strategic geographical location, the scope for the consolidation and transshipment service is always on the rise.

As growing number of multinational companies have regional offices in Jebel Ali Free zone, the requirement for cross trade and re-export shipments have increased in the last few years. Regular movements from the Far East to the Middle East are controlled right here in the UAE and hence all bookings and Documentation processes are managed locally. CNS Switches Bills of Ladings as per the requirement of the Customers.
CNS Logistics is equipped with skilled persons in Industrial Packing, handling Personal effects and professionals in dismantling and moving heavy equipments.

Logistics in a nutshell is based on 4 basic flows. A successful combination of these flows, according to customer requirements and market conditions, backed by the ideal mode of transport, will generate the exact Logistics solution.

- Product Flow
- Document Flow
- Information Flow
- Finance Flow

Jebel Ali Free Trade Zone Area (JAFZA) as Ideal Base

Jebel Ali Free Trade Zone Area has become a crucial centre for investors and international companies with the advantage of a wide range of facilities, including distribution to a whole spectrum of manufacturing / trading activities. CNS also being presents in Jebel Ali Trade Free zone is becoming a regional as well as an international player.

Jebel Ali Free Zone Area is also a power player, influencing a major role in the transshipment hub of Dubai, while providing exciting and unlimited possibilities for Industrial Development. Jebel Ali Free Zone Area aims to be one of the largest and fastest growing free zones and ultimately become the leading international business hub that is recognized and preferred globally.

CNS Logistics in Jebel Ali Free Zone Area

4.1 Vision

CNS Logistics has a vision to successfully grow and diversify business to the benefit of our customers and employees, creating value and profitability.
4.2 Strategy
CNS’s Strategy is to develop logistics solutions with a clear mission, which will create new value for our customer. It is important to stay connected with the changing trends. Hence, it is a matter of necessity to develop industry-focused expertise, by taking a holistic approach that benefits our customers. To establish a corporate identity is our foremost strategy while providing solutions to our customers at the right place at the right time, at the right price.
